RESPONSE (F) TO OFFICE ACTION

Applicants have the following response to the Office Action of October 18, 2007 and to the Examiner's sole rejection in the Office Action.

Claim Rejections - 35 USC §102

In the Office Action, the Examiner rejects Claims 79-85 under 35 USC §102(e) as being anticipated by Jones et al. (US 6,016,033). This rejection is respectfully traversed.

More specifically, independent Claim 79 of the present application recites the feature of "a patterned electrode formed above the substrate, defining a plurality of light emitting elements having gaps between the light emitting elements." The Examiner contends that Jones teaches in figure 1 "a patterned electrode (200) formed above the substrate, defining a plurality of light
